Effective as of 1 March 2026

1. Coverage of Healthcare Services under Public Health Insurance

The scope of healthcare services covered by public health insurance is governed by contractual arrangements concluded with individual health insurance providers and by applicable legal regulations. Insured persons of health insurance providers with which **MY CLINIC** has entered into a contract for the relevant medical specialty are entitled to healthcare services reimbursed from public health insurance within the specified scope. Healthcare services at **MY CLINIC** are primarily provided within comprehensive care programmes. In the case of a single (one-off) visit outside such programmes, the patient is required to pay the applicable fee for supplementary non-medical services.

2. Supplementary Non-Medical Services

Fee for supplementary non-medical services: CZK 2,950
Supplementary non-medical services constitute a package of organisational, administrative and client support services provided with the aim of enhancing client comfort and service coordination. The detailed scope of these services is defined in the General Terms and Conditions (GTC). Payment of the fee for supplementary non-medical services is not a condition for acceptance into medical care. However, without such payment, the patient is not entitled to utilise the non-medical services included in the supplementary services package. Healthcare services covered by public health insurance are provided in full without the requirement to pay for supplementary non-medical services.

3. Contracted Health Insurance Providers and Specialties

MY CLINIC has concluded contracts with the following health insurance providers for the medical specialties listed below:
VZP – General Practice and Internal Medicine, Paediatrics, Gynaecology, Allergology, Diabetology, Dermatology and Surgery
